

Subject: Proposed Bill No. 374

Dear Committee Members,

I apologize if this email is being sent to the wrong place - I could not find another contact form.

I live in Tennessee and homeschool my children. I am shocked at the contents of Proposed Bill No. 374, and I urge you to defeat it immediately.

In addition to violation of privacy and 4th Amendment rights, this sets a dangerous precedent for homeschooling families. I homeschool specifically because I do NOT want my children subject to government-run investigations and mental health screenings. They are children, and need not be forcibly subjected to such invasions.

Passing this law in CT sets a precedent for other states, and the federal government, to follow suit.

Please, defeat this bill now to prevent *1984* from inching closer to reality.

Sincerely,

Matt Hollingsworth
Tennessee resident
